

UVF3™

The Highest Standards...
The **SAFEST** Drinking Water

THE LATEST IN BOTTLE-LESS TECHNOLOGY

**Now In
Hot/Cold/Sparkling!**

Latest in Bottle-less Technology

The innowave uvf3™ is the most attractive unit on the market today. Its sleek design executed in two-tone silver and charcoal is among the easiest systems to install, service and maintain. Treating incoming tap water at the point-of-use, the innowave uvf3™ completely eliminates bottles and their related hassles.

Self-Sanitizing UV Technology

The innowave uvf3™ utilizes ultraviolet light to improve the microbiological quality of drinking water. Not only does this system reduce potential incoming microorganisms such as parasites, viruses, and bacteria, it also maintains the quality of the stored drinking water. An in-tank UV light also helps keep the water in the cold tank sanitized by preventing the growth of heterotrophic (non-disease causing) bacteria. Unchlorinated water that is stored can be a prime breeding ground for heterotrophic bacteria and can also lead to a slimy coating around the storage container called biofilm.

User Friendly and Cost Efficient

The innowave uvf3™ talks your language, featuring a PCB that communicates in three languages. The LCD read out can be programmed in English, Spanish or French, to meet the needs of your local market. The "Sleep Mode" feature optimizes power usage by hibernating during low usage periods, such as nights or weekends. Field servicing through the flip top makes preventive maintenance a process of just minutes every six-months.

Smartest System on the Market

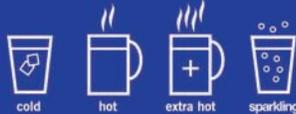

The filter timer alerts you when the filters need changing. The Automatic Purity Monitoring System (APMS) notifies the need for UV lamp replacement. These smart features monitor the system making sure you are always getting the best quality water.

The innowave uvf3™ Now Comes With Sparkling Water!

Innowave UVF3™ Specifications

Width: 17 in.
Depth: 18 in.
Height With Base: 49.25 in. Without Base: 17.5 in.
Water Connection: 1/4" tubing

Weight: 102 lbs. (dry)
Power Supply: 120V/60Hz
Amps: 8.95 Amps (Hot/Cold)
Cold Water Temp: 37-54°F
Hot Water Temp: 158-203°F
All figures are approximate and subject to change

The innowave uvf3™ has been tested and complies with UL Standard 399 and UL Standard 471

- ① 1-Micron Carbon Block Filter
- ② Granular Activated Carbon Filter
- ③ Ultraviolet Light

The **SAFEST** Drinking Water

THE LATEST IN BOTTLE-LESS TECHNOLOGY

3-Stage Filtration

The Latest in Bottle-less Technology

The innowave uvf3™ uses some of the most recent technological advancements in filtration and ultraviolet light to assure fresh, great-tasting drinking water.

The innowave UVF3™ Features

- :: Low voltage access panel for servicing
- :: Ergonomically placed access to filters and UV lamp
- :: 3 language display options - English, Spanish and French
- :: Cold, hot, and sparkling water dispenser
- :: "Sleep mode" energy saver
- :: Standard filter timer
- :: Large drip tray with overflow sensor and drainage option
- :: High capacity chilling tanks
- :: Base cabinet option with or without cup holders

Features Customers Love

A unique pop-up cup holder option can be installed in the base of the unit. It also provides storage for extra cups, CO₂ cylinder (for sparkling water), and supplies. A large drip tray with an overflow protection sensor reduces the potential for spills. If there is access to a drain, a convenient drip tray drainage option can be installed.

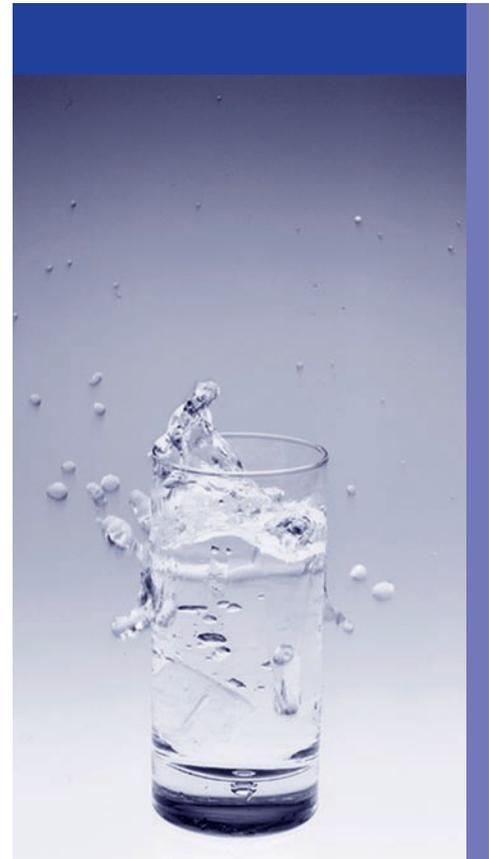

Counter Top Option for Smaller Spaces

Is space a little tight in your workplace? Consider the counter top version of the innowave uvf3™. It offers the same quality, volume, and convenience as the floor model!

Optional Base Cabinet with Cup Holder & Storage

The optional base cabinet and cup dispenser offers convenience not found with other water coolers. Less trips to the storeroom!

The Highest Standards

innowave's goal is to provide water treatment systems that meet the highest standards and provide the safest drinking water. By utilizing a combination of modern water treatment technologies, innowave® water treatment systems consistently provide high quality drinking water.
